AUTHOR INDEX VOL. 46

Amer, M.A., see Fernandes, C.F. (46) 343
Andersson, R.E., see Daeschel, M.A. (46) 357
Antranikian, G. and Giffhorn, F.
Citrate metabolism in anaerobic bacteria (46) 175

Beacham, I.R.
Silent genes in prokaryotes (46) 409
Busscher, H.J. and Weerkamp, A.H.
Specific and non-specific interactions in bacterial adhesion to solid substrata (46) 165

Chassy, B.M.
Prospects for the genetic manipulation of lactobacilli (46) 297
Collinge, A.J., see Markham, P. (46) 1
Condon, S.
Responses of lactic acid bacteria to oxygen (46) 269
Cook, A.M.
Biodegradation of *s*-triazine xenobiotics (46) 93
Cooke, R.D., Twiddy, D.R. and Reilly, P.J.A.
Lactic-acid fermentation as a low-cost means of food preservation in tropical countries (46) 369

Daeschel, M.A., Andersson, R.E. and Fleming, H.P.
Microbial ecology of fermenting plant materials (46) 357
De Vos, W.M.
Gene cloning and expression in lactic streptococci (46) 281

Ferguson, S.J., Jackson, J.B. and McEwan, A.G.
Anaerobic respiration in the Rhodospirillaceae: characterisation of pathways and evaluation of roles in redox balancing during photosynthesis (46) 117
Fernandes, C.F., Shahani, K.M. and Amer, M.A.
Therapeutic role of dietary lactobacilli and lactobacillic fermented dairy products (46) 343
Fleming, H.P., see Daeschel, M.A. (46) 357

Gennis, R.B.
The cytochromes of *Escherichia coli* (46) 387
Giffhorn, F., see Antranikian, G. (46) 175
Gurr, M.I.
Nutritional aspects of fermented milk products (46) 337

Haaker, H. and Klugkist, J.
The bioenergetics of electron transport to nitrogenase (46) 57

Jackson, J.B., see Ferguson, S.J. (46) 117

Kashket, E.R.
Bioenergetics of lactic acid bacteria: cytoplasmic pH and osmotolerance (46) 233
Klaenhammer, T.R.
Plasmid-directed mechanisms for bacteriophage defense in lactic streptococci (46) 313
Klugkist, J., see Haaker, H. (46) 57
Knirel, Yu.A. and Kochetkov, N.K.
2,3-Diamino-2,3-dideoxyuronic and 5,7-diamino-3,5,7,9-tetradeoxynonulosonic acids: new components of bacterial polysaccharides (46) 381
Kochetkov, N.K., see Knirel, Yu.A. (46) 381

LeGall, J. and Peck Jr., H.D.
Amino-terminal amino acid sequences of electron transfer proteins from Gram-negative bacteria as indicators of their cellular localization: the sulfate-reducing bacteria (46) 35
Legan, J.D., see Owens, J.D. (46) 419
Ludwig, B.
Cytochrome *c* oxidase in prokaryotes (46) 41

McCarthy, A.J.
Lignocellulose-degrading actinomycetes (46) 145
McEwan, A.G., see Ferguson, S.J. (46) 117
Markham, P. and Collinge, A.J.
Woronin bodies of filamentous fungi (46) 1
Marshall, V.M.
Lactic acid bacteria: starters for flavour (46) 327
Mountfort, D.O.
The rumen anaerobic fungi (46) 401

Owens, J.D. and Legan, J.D.
Determination of the Monod substrate saturation constant for microbial growth (46) 419

Peck Jr., H.D., see LeGall, J. (46) 35
Pritchard, G.G., see Thomas, T.D. (46) 245

Reilly, P.J.A., see Cooke, R.D. (46) 369
Rochaix, J.-D.
Molecular genetics of chloroplasts and mitochondria in the unicellular green alga *Chlamydomonas* (46) 13

Sandine, W.E.
Looking backward and forward at the practical applications of genetic researches on lactic acid bacteria (46) 205
Schleifer, K.H.
Recent changes in the taxonomy of lactic acid bacteria (46) 201

Shahani, K.M., see Fernandes, C.F. (46) 343
Siegl, G. and Tratschin, J.-D.
Parvoviruses: agents of distinct pathogenic and molecular potential (46) 433
Stam, H., Stouthamer, A.H. and Van Verseveld, H.W.
Hydrogen metabolism and energy costs of nitrogen fixation (46) 73
Stouthamer, A.H., see Stam, H. (46) 73

Thomas, T.D. and Pritchard, G.G.
Proteolytic enzymes of dairy starter cultures (46) 245
Thompson, J.
Regulation of sugar transport and metabolism in lactic acid bacteria (46) 221
Tratschin, J.-D., see Siegl, G. (46) 433
Twiddy, D.R., see Cooke, R.D. (46) 369

Van Verseveld, H.W., see Stam, H. (46) 73

Weerkamp, A.H., see Busscher, H.J. (46) 165

FEMS Microbiology Reviews

SUBJECT INDEX VOL. 46

Acetylation/deacetylation
Citrate lyase regulation; Phosphorylation/dephosphorylation; Effect of glutamate (Antranikian, G. (46) 175)

Affinity constant
Growth; Saturation constant (Owens, J.D. (46) 419)

Amino-terminal sequence
Sulphate-reducing bacterium; Electron transfer protein; Signal peptide (LeGall, J. (46) 35)

Anaerobic fungi
Rumen; Plant structural material; Degradation; Fermentation (Mountfort, D.O. (46) 401)

Anaerobic respiration
Rhodospirillaceae; Photosynthesis (Ferguson, S.J. (46) 117)

Anticarcinogenic activity
Antimicrobial activity; Protection against disease; Anticholesteremic factor; *Lactobacillus* sp.; Dairy product (Fernandes, C.F. (46) 343)

Anticholesteremic factor
Antimicrobial activity; Protection against disease; Anticarcinogenic activity; *Lactobacillus* sp.; Dairy product (Fernandes, C.F. (46) 343)

Antimicrobial activity
Protection against disease; Anticholesteremic factor; Anticarcinogenic activity; *Lactobacillus* sp.; Dairy product (Fernandes, C.F. (46) 343)

Ascomycete
Woronin body; Organelle; (Septal plugging, Hyphal damage) (Markham, P. (46) 1)

Bacterial adhesion
Hydrophobicity; Surface free energy; Zeta potential; Oral streptococci (Busscher, H.J. (46) 165)

Bioconversion
Ecology; Lignin degradation; Cellulases; Xylanases; Saccharification (McCarthy, A.J. (46) 145)

Biodegradation
s-Triazine (Cook, A.M. (46) 93)

Cell cycle dependence
Genome organization; Eukaryotic vector; DNA replication; Viral helper function; Oncolysis (Siegl, G. (46) 433)

Cellulases
Ecology; Lignin degradation; Xylanases; Bioconversion; Saccharification (McCarthy, A.J. (46) 145)

Chlamydomonas
Photosynthetic mutants; DNA, chloroplast; DNA, mitochondrial (Rochaix, J.-D. (46) 13)

Citrate lyase regulation
Acetylation/deacetylation; Phosphorylation/dephosphorylation; Effect of glutamate (Antranikian, G. (46) 175)

Conjugation
Lactic acid bacteria; Starter culture; Plasmid; Genetic engineering; Transformation; Transduction (Sandine, W.E. (46) 205)

Plasmid; *Lactobacillus* sp.; Transformation; Transfection; Liposome; Genetic engineering; Protoplast fusion (Chassy, B.M. (46) 297)

Restriction and modification; Phage adsorption; Genetic transfer; Phage-insensitive starters (Klaenhammer, T.R. (46) 313)

Cryptic gene
Inactive genes; Pseudogene; Gene duplication; Evolution (Beacham, I.R. (46) 409)

Cultured buttermilk
Lactic acid bacteria; Yoghurt; Kefir; Lactose digestion; Protein quality; Vitamin (Gurr, M.I. (46) 337)

Cytochrome
Escherichia coli; Heme (Gennis, R.B. (46) 387)

Cytochrome *c* oxidase
Heme aa_3; Electron transport, bacterial (Ludwig, B. (46) 41)

Cytoplasmic pH
Fermentation end products; Proton motive force; Osmotolerance; Glycine betaine; Lactic acid bacteria (Kashket, E.R. (46) 233)

Dairy product
Antimicrobial activity; Protection against disease; Anticholesteremic factor; Anticarcinogenic activity; *Lactobacillus* sp. (Fernandes, C.F. (46) 343)

Degradation
Anaerobic fungi; Rumen; Plant structural material; Fermentation (Mountfort, D.O. (46) 401)

DNA, chloroplast
Photosynthetic mutants; DNA, mitochondrial; *Chlamydomonas* (Rochaix, J.-D. (46) 13)

DNA, mitochondrial
Photosynthetic mutants; DNA, chloroplast; *Chlamydomonas* (Rochaix, J.-D. (46) 13)

DNA replication
Genome organization; Eukaryotic vector; Cell cycle dependence; Viral helper function; Oncolysis (Siegl, G. (46) 433)

Ecology
Lignin degradation; Cellulases; Xylanases; Bioconversion; Saccharification (McCarthy, A.J. (46) 145)

Effect of glutamate
Citrate lyase regulation; Acetylation/deacetylation; Phosphorylation/dephosphorylation (Antranikian, G. (46) 175)

Electron transfer protein
Sulphate-reducing bacterium; Amino-terminal sequence; Signal peptide (LeGall, J. (46) 35)

Electron transport
Nitrogenase; (Bioenergetics) (Haaker, H. (46) 57)

Electron transport, bacterial
Cytochrome *c* oxidase; Heme aa_3 (Ludwig, B. (46) 41)

Escherichia coli
Cytochrome; Heme (Gennis, R.B. (46) 387)

Eukaryotic vector
Genome organization; DNA replication; Cell cycle dependence; Viral helper function; Oncolysis (Siegl, G. (46) 433)

Evolution
Inactive genes; Cryptic gene; Pseudogene; Gene duplication (Beacham, I.R. (46) 409)

Fermentation
Anaerobic fungi; Rumen; Plant structural material; Degradation (Mountfort, D.O. (46) 401)

Fermentation end products
Cytoplasmic pH; Proton motive force; Osmotolerance; Glycine betaine; Lactic acid bacteria (Kashket, E.R. (46) 233)

Fermented milk
Flavour volatiles; Mesophilic starters; Thermophilic starters; Mixed cultures (Marshall, V.M. (46) 327)

Flavour volatiles
Fermented milk; Mesophilic starters; Thermophilic starters; Mixed cultures (Marshall, V.M. (46) 327)

Food preservation
Lactic acid fermentation; Lactic acid bacteria; Starter cultures; (Pickles); (Sauerkraut); (Silage) (Daeschel, M.A. (46) 357)

Lactic acid bacteria; (Fish); (Cassava); (Meat); (Tropical countries) (Cooke, R.D. (46) 369)

Futile cycle
Glycolysis; Pyruvate kinase; Inducer exclusion-expulsion; Phosphoenolpyruvate-dependent sugar:phosphotransferase system (Thompson, J. (46) 221)

Gene cloning
Recombinant DNA; Plasmid vector; Gene expression; Lactic streptococcus (De Vos, W.M. (46) 281)

Gene duplication
Inactive genes; Cryptic gene; Pseudogene; Evolution (Beacham, I.R. (46) 409)

Gene expression
Recombinant DNA; Plasmid vector; Gene cloning; Lactic streptococcus (De Vos, W.M. (46) 281)

Genetic engineering
Lactic acid bacteria; Starter culture; Plasmid; Conjugation; Transformation; Transduction (Sandine, W.E. (46) 205)

Plasmid; *Lactobacillus* sp.; Transformation; Transfection; Liposome; Conjugation; Protoplast fusion (Chassy, B.M. (46) 297)

Genetic transfer
Restriction and modification; Phage adsorption; Conjugation; Phage-insensitive starters (Klaenhammer, T.R. (46) 313)

Genome organization
Eukaryotic vector; DNA replication; Cell cycle dependence; Viral helper function; Oncolysis (Siegl, G. (46) 433)

Glycine betaine
Cytoplasmic pH; Fermentation end products; Proton motive force; Osmotolerance; Lactic acid bacteria (Kashket, E.R. (46) 233)

Glycolysis
Futile cycle; Pyruvate kinase; Inducer exclusion-expulsion; Phosphoenolpyruvate-dependent sugar:phosphotransferase system (Thompson, J. (46) 221)

Growth
Saturation constant; Affinity constant (Owens, J.D. (46) 419)

Heme
Cytochrome; *Escherichia coli* (Gennis, R.B. (46) 387)

Heme aa_3
Cytochrome *c* oxidase; Electron transport, bacterial (Ludwig, B. (46) 41)

Hydrogen metabolism
Nitrogen fixation; (Energy costs) (Stam, H. (46) 73)

Hydrophobicity
Surface free energy; Zeta potential; Oral streptococci; Bacterial adhesion (Busscher, H.J. (46) 165)

Inactive genes
Cryptic gene; Pseudogene; Gene duplication; Evolution (Beacham, I.R. (46) 409)

Inducer exclusion-expulsion
Glycolysis; Futile cycle; Pyruvate kinase; Phosphoenolpyruvate-dependent sugar:phosphotransferase system (Thompson, J. (46) 221)

Kefir
Lactic acid bacteria; Yoghurt; Cultured buttermilk; Lactose digestion; Protein quality; Vitamin (Gurr, M.I. (46) 337)

Lactic acid bacteria
Taxonomy (Schleifer, K.H. (46) 201)

Starter culture; Plasmid; Genetic engineering; Conjugation; Transformation; Transduction (Sandine, W.E. (46) 205)

Cytoplasmic pH; Fermentation end products; Proton motive force; Osmotolerance; Glycine betaine (Kashket, E.R. (46) 233)

Oxygen (Condon, S. (46) 269)

Yoghurt; Kefir; Cultured buttermilk; Lactose digestion; Protein quality; Vitamin (Gurr, M.I. (46) 337)

Food preservation; Lactic acid fermentation; Starter cultures; (Pickles); (Sauerkraut); (Silage) (Daeschel, M.A. (46) 357)

Food preservation; (Fish); (Cassava); (Meat); (Tropical countries) (Cooke, R.D. (46) 369)

Lactic acid fermentation
Food preservation; Lactic acid bacteria; Starter cultures; (Pickles); (Sauerkraut); (Silage) (Daeschel, M.A. (46) 357)

Lactic streptococcus
Recombinant DNA; Plasmid vector; Gene cloning; Gene expression (De Vos, W.M. (46) 281)

***Lactobacillus* sp.**
Plasmid; Transformation; Transfection; Liposome; Conjugation; Genetic engineering; Protoplast fusion (Chassy, B.M. (46) 297)

Antimicrobial activity; Protection against disease; Anticholesteremic factor; Anticarcinogenic activity; Dairy product (Fernandes, C.F. (46) 343)

Lactose digestion
Lactic acid bacteria; Yoghurt; Kefir; Cultured buttermilk; Protein quality; Vitamin (Gurr, M.I. (46) 337)

Lignin degradation
Ecology; Cellulases; Xylanases; Bioconversion; Saccharification (McCarthy, A.J. (46) 145)

Lipopolysaccharides
Pseudomonas aeruginosa; Uronic acid; Ulosonic acid (Knirel, Yu.A. (46) 381)

Liposome
Plasmid; *Lactobacillus* sp.; Transformation; Transfection; Conjugation; Genetic engineering; Protoplast fusion (Chassy, B.M. (46) 297)

Mesophilic starters
Fermented milk; Flavour volatiles; Thermophilic starters; Mixed cultures (Marshall, V.M. (46) 327)

Mixed cultures
Fermented milk; Flavour volatiles; Mesophilic starters; Thermophilic starters (Marshall, V.M. (46) 327)

Nitrogenase
Electron transport; (Bioenergetics) (Haaker, H. (46) 57)

Nitrogen fixation
Hydrogen metabolism; (Energy costs) (Stam, H. (46) 73)

Oncolysis
Genome organization; Eukaryotic vector; DNA replication; Cell cycle dependence; Viral helper function (Siegl, G. (46) 433)

Oral streptococci
Hydrophobicity; Surface free energy; Zeta potential; Bacterial adhesion (Busscher, H.J. (46) 165)

Organelle
Ascomycete; Woronin body; (Septal plugging, Hyphal damage) (Markham, P. (46) 1)

Osmotolerance
Cytoplasmic pH; Fermentation end products; Proton motive force; Glycine betaine; Lactic acid bacteria (Kashket, E.R. (46) 233)

Oxygen
Lactic acid bacteria (Condon, S. (46) 269)

Peptidase
Proteinase; Starter culture; (Proteolysis in milk and cheese) (Thomas, T.D. (46) 245)

Phage adsorption
Restriction and modification; Genetic transfer; Conjugation; Phage-insensitive starters (Klaenhammer, T.R. (46) 313)

Phage-insensitive starters
Restriction and modification; Phage adsorption; Genetic transfer; Conjugation (Klaenhammer, T.R. (46) 313)

Phosphoenolpyruvate-dependent sugar:phosphotransferase system
Glycolysis; Futile cycle; Pyruvate kinase; Inducer exclusion-expulsion (Thompson, J. (46) 221)

Phosphorylation / dephosphorylation
Citrate lyase regulation; Acetylation/deacetylation; Effect of glutamate (Antranikian, G. (46) 175)

Photosynthesis
Rhodospirillaceae; Anaerobic respiration (Ferguson, S.J. (46) 117)

Photosynthetic mutants
DNA, chloroplast; DNA, mitochondrial; *Chlamydomonas* (Rochaix, J.-D. (46) 13)

Plant structural material
Anaerobic fungi; Rumen; Degradation; Fermentation (Mountfort, D.O. (46) 401)

Plasmid
Lactic acid bacteria; Starter culture; Genetic engineering; Conjugation; Transformation; Transduction (Sandine, W.E. (46) 205)

Lactobacillus sp.; Transformation; Transfection; Liposome; Conjugation; Genetic engineering; Protoplast fusion (Chassy, B.M. (46) 297)

Plasmid vector
Recombinant DNA; Gene cloning; Gene expression; Lactic streptococcus (De Vos, W.M. (46) 281)

Protection against disease
Antimicrobial activity; Anticholesteremic factor; Anticarcinogenic activity; *Lactobacillus* sp.; Dairy product (Fernandes, C.F. (46) 343)

Proteinase
Peptidase; Starter culture; (Proteolysis in milk and cheese) (Thomas, T.D. (46) 245)

Protein quality
Lactic acid bacteria; Yoghurt; Kefir; Cultured buttermilk; Lactose digestion; Vitamin (Gurr, M.I. (46) 337)

Proton motive force
Cytoplasmic pH; Fermentation end products; Osmotolerance; Glycine betaine; Lactic acid bacteria (Kashket, E.R. (46) 233)

Protoplast fusion
Plasmid; *Lactobacillus* sp.; Transformation; Transfection; Liposome; Conjugation; Genetic engineering (Chassy, B.M. (46) 297)

Pseudogene
Inactive genes; Cryptic gene; Gene duplication; Evolution (Beacham, I.R. (46) 409)

Pseudomonas aeruginosa
Lipopolysaccharides; Uronic acid; Ulosonic acid (Knirel, Yu.A. (46) 381)

Pyruvate kinase
Glycolysis; Futile cycle; Inducer exclusion-expulsion; Phosphoenolpyruvate-dependent sugar:phosphotransferase system (Thompson, J. (46) 221)

Recombinant DNA
Plasmid vector; Gene cloning; Gene expression; Lactic streptococcus (De Vos, W.M. (46) 281)

Restriction and modification
Phage adsorption; Genetic transfer; Conjugation; Phage-insensitive starters (Klaenhammer, T.R. (46) 313)

Rhodospirillaceae
Photosynthesis; Anaerobic respiration (Ferguson, S.J. (46) 117)

Rumen
Anaerobic fungi; Plant structural material; Degradation; Fermentation (Mountfort, D.O. (46) 401)

Saccharification
Ecology; Lignin degradation; Cellulases; Xylanases; Bioconversion (McCarthy, A.J. (46) 145)

Saturation constant
Growth; Affinity constant (Owens, J.D. (46) 419)

Signal peptide
Sulphate-reducing bacterium; Electron transfer protein; Amino-terminal sequence (LeGall, J. (46) 35)

Starter culture
Lactic acid bacteria; Plasmid; Genetic engineering; Conjugation; Transformation; Transduction (Sandine, W.E. (46) 205)

Proteinase; Peptidase; (Proteolysis in milk and cheese) (Thomas, T.D. (46) 245)

Starter cultures
Food preservation; Lactic acid fermentation; Lactic acid bacteria; (Pickles); (Sauerkraut); (Silage) (Daeschel, M.A. (46) 357)

Sulphate-reducing bacterium
Electron transfer protein; Amino-terminal sequence; Signal peptide (LeGall, J. (46) 35)

Surface free energy
Hydrophobicity; Zeta potential; Oral streptococci; Bacterial adhesion (Busscher, H.J. (46) 165)

Taxonomy
Lactic acid bacteria (Schleifer, K.H. (46) 201)

Thermophilic starters
Fermented milk; Flavour volatiles; Mesophilic starters; Mixed cultures (Marshall, V.M. (46) 327)

Transduction
Lactic acid bacteria; Starter culture; Plasmid; Genetic engineering; Conjugation; Transformation (Sandine, W.E. (46) 205)

Transfection
Plasmid; *Lactobacillus* sp.; Transformation; Liposome; Conjugation; Genetic engineering; Protoplast fusion (Chassy, B.M. (46) 297)

Transformation
Lactic acid bacteria; Starter culture; Plasmid; Genetic engineering; Conjugation; Transduction (Sandine, W.E. (46) 205)

Plasmid; *Lactobacillus* sp.; Transfection; Liposome; Conjugation; Genetic engineering; Protoplast fusion (Chassy, B.M. (46) 297)

***s*-Triazine**
Biodegradation (Cook, A.M. (46) 93)

Ulosonic acid
Pseudomonas aeruginosa; Lipopolysaccharides; Uronic acid (Knirel, Yu.A. (46) 381)

Uronic acid
Pseudomonas aeruginosa; Lipopolysaccharides; Ulosonic acid (Knirel, Yu.A. (46) 381)

Viral helper function
Genome organization; Eukaryotic vector; DNA replication; Cell cycle dependence; Oncolysis (Siegl, G. (46) 433)

Vitamin
Lactic acid bacteria; Yoghurt; Kefir; Cultured buttermilk; Lactose digestion; Protein quality (Gurr, M.I. (46) 337)

Woronin body
Ascomycete; Organelle; (Septal plugging, Hyphal damage) (Markham, P. (46) 1)

Xylanases
Ecology; Lignin degradation; Cellulases; Bioconversion; Saccharification (McCarthy, A.J. (46) 145)

Yoghurt
Lactic acid bacteria; Kefir; Cultured buttermilk; Lactose digestion; Protein quality; Vitamin (Gurr, M.I. (46) 337)

Zeta potential
Hydrophobicity; Surface free energy; Oral streptococci; Bacterial adhesion (Busscher, H.J. (46) 165)
